

2025 Impact Report

This September, EarthShare NC hosted the 2nd Annual NC Climate Week—equipping individuals and businesses to work individually and collectively with nonprofits and local governments on climate solutions and resilience. The outcomes: new knowledge, new commitments to action, and new connections to accelerate the adoption of climate solutions across NC.

LEARNING

Experts shared proven solutions to reduce some of the biggest contributors to climate change, guidance for businesses in the changing landscape, and tools to increase community resiliency.

See the session recordings: ncclimateweek.org.

10 Climate Action Workshops

308 Attendees

40 Speakers

CONNECTIONS

Local leaders and climate enthusiasts convened for a day of learning and cross-sector connections.

1 Summit in partnership with City of Greensboro

118 Local leaders and climate enthusiasts

20 Speakers

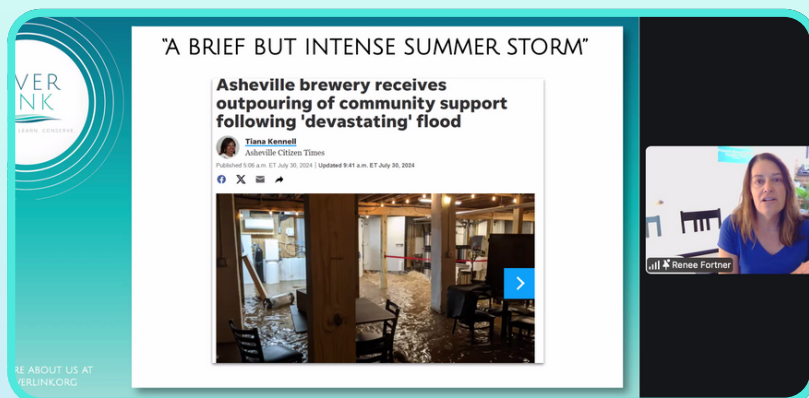

IMPACT

NC Climate Week participants reported:

- ✓ new commitments to climate solutions
- ✓ new information and insights
- ✓ increased confidence to take climate action
- ✓ being more likely to act on information

“Each segment was an opportunity to be challenged, inspired, and encouraged in our fight for sustainability. We left this place more passionate than ever about making a difference...”

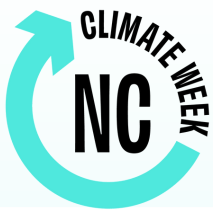

“The convening work you do is crucial to continuing to move the conversation forward and bring more people into the fold.”

“Your Yard, Your Neighbors, Your Resiliency” Workshop
